# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA**

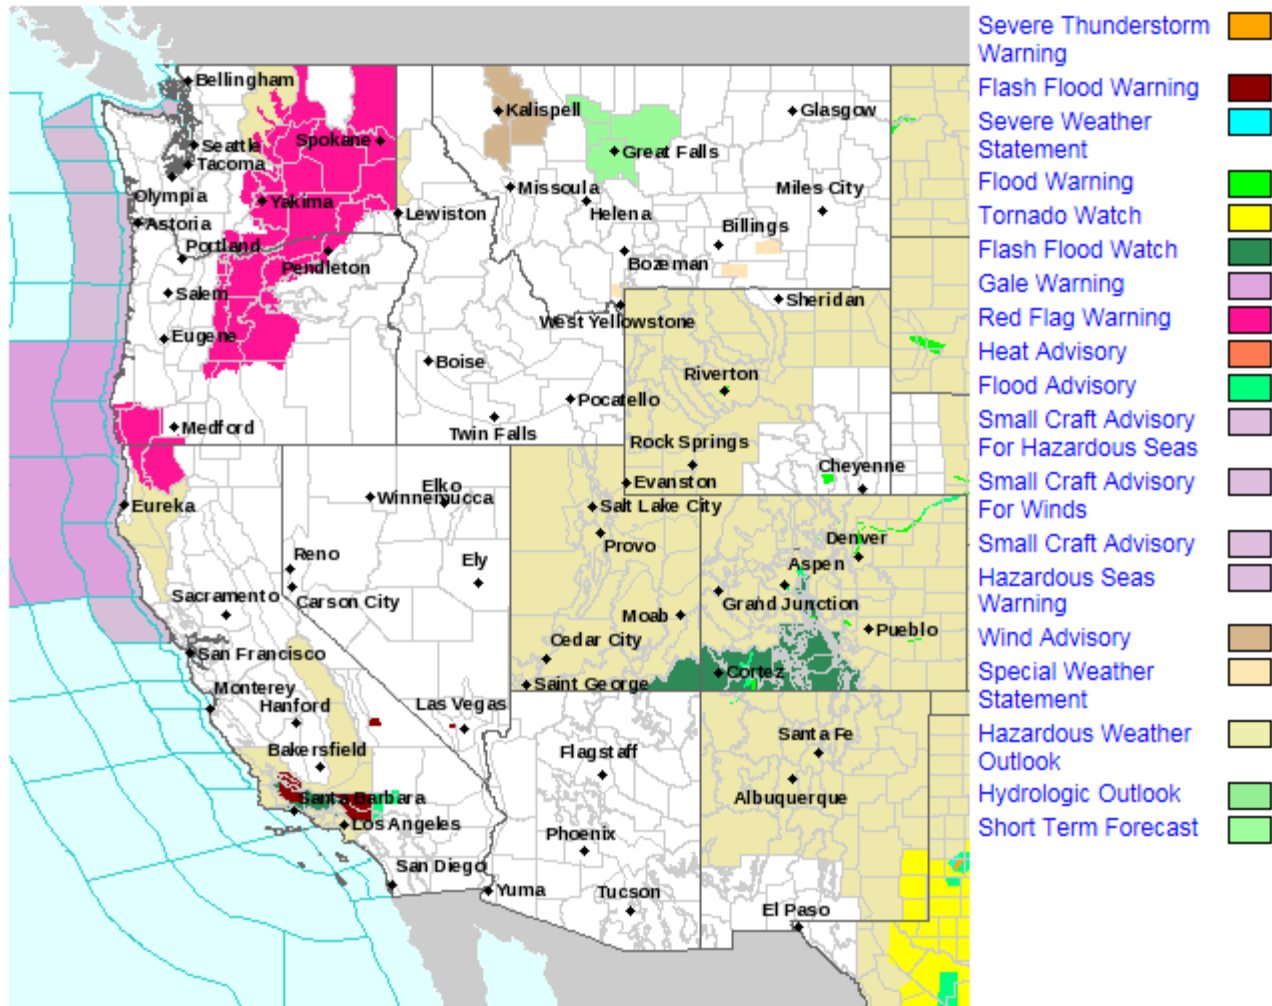

High pressure has strengthened considerably over northern California in the past 36 hours. The airmass dried and stabilized sufficiently Thursday, such that Northern California remained lightning-free for the first time in several days. The south half of the Area remained fairly humid Thursday, but today will dry out to more closely match the north half, with an 8-20 percent minimum relative humidity range the rule for areas east of the coast ranges this afternoon. Overnight relative humidity recovery became poorer in many areas Thursday night, and it will continue that way tonight, particularly above midslope and/or where breezes persist. A tightening of surface pressure gradients late yesterday has led to light northwest to northeast winds over the bulk of Northern California for the next couple of days. There will be areas of moderate speeds (10-18 Gust 20s mph) in and near mainly the north half of the Sacramento Valley and adjacent foothills. The upper ridge flattens some over Northern California Sunday into Monday, but only minor temp and relative humidity relief are expected. That change will also bring about surfacing of stronger southwest to west-northwest p.m. gradient winds over most areas from the Cascade/Sierras eastward next week.

### **SOUTHERN CALIFORNIA**

A weak area of low pressure currently over Central California will drop southward into Southern California this afternoon bringing scattered showers and thunderstorms mainly to the mountains and deserts through tonight. However, some of the activity could move into the Central Valley as well as the coastal and valley locations of Southern California. Maximum temperatures will increase several degrees away from the coast today as the main low pressure area over the Four Corners Area moves eastward into the Plains. Maximum temperatures will be in the mid 70s to mid 80s across the mountains and upper 80s and 90s in the inland valleys. Minimum humidity will be mainly between 20% and 40% away from the coastal areas today. High pressure will approach the state from the southwest bringing a slow warming and drying trend to the region Saturday through the end of next week. The warmer valley locations will be over 100 degrees and minimum humidity away from the coastal areas will be in the single digits and teens by Monday. Isolated afternoon showers and thunderstorms will occur over the mountains Saturday and then there will be no thunderstorm activity through the end of next week.

# **CAL OES 2014 DROUGHT**

## **Cal EOC Incident – 2014 Drought**

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought
